

## Legend® Series

Positive Displacement Blowers  
& Vacuum Pumps

## Sutorbilt Legend Series

### Setting the Industry Standard for Over 70 Years

Gardner Denver's Sutorbilt® Legend® line of rotary positive displacement lobe blowers and vacuum pumps are the result of more than seventy years experience in the design, manufacture and support of superior industrial equipment.

### Why the Sutorbilt line of blowers and vacuum pumps earned the name "Legend."

- Backed by one of the largest distributor networks in the industry
- Every Sutorbilt Legend blower/vacuum pump is built under rigid ISO 9001:2000 quality standards
- Each Legend is individually tested to meet rigorous performance specifications
- Requested by leading Original Equipment Manufacturers (OEMs) worldwide for a wide range of applications, due to the ability to customize the Legend to their specifications while meeting strict performance requirements
- A Legend is at the heart of an ever-expanding variety of air solutions working every minute of every day around the globe
- Available in 20 sizes with 4 different configurations
- The Legend Series delivers
  - Pressure to 15 psig
  - Vacuum to 16" Hg
  - Flows to 3,015 scfm

## Proven Performance. Global Applications. Local Support.

### QUIET OPERATION

The sound data shown below compares the Legend (red) and a comparably sized blower (green) operating at 3,275 rpm and 12 psig.

- Improved blower design reduces the sound pressure output of the Legend blower
- Typical reduction is 3 dBA which represents 50% less noise than the competition

### SUPERIOR LOCAL SALES AND SERVICE

- Extensive network of authorized Gardner Denver/ Sutorbilt distributors
- Offers the most convenient local sales and service support in the industry
- Factory trained professionals are experts in blower/ vacuum pump technology
- Providing system installation guidance, troubleshooting and optimization recommendations for new or existing applications

### EVEN A “LEGENDARY” WARRANTY

Every Sutorbilt Legend Series blower/vacuum pump is covered by a “Legendary” warranty: 24 months from the date of shipment or 18 months from the date of installation.

INDUSTRY	APPLICATION
Aquaculture	Aeration
Cement & Lime	Fluidization & Conveying
Chemical	Vacuum Processing & Conveying
Coal Bed/Landfill	Methane Gas Recovery
Dairy	Automated Milking
Dry Bulk Hauling	Trailer Unloading & Aeration
Environmental Services	Sewer Cleaning & Portable Restroom Services
Industrial	Material Vacuuming
Milling & Baking	Blending & Conveying
Oil & Gas	Gas Collection & Sparging
Power Generation	Fly Ash Conveying & Aeration
Process Gas	Gas Boosting
Pulp & Paper	Chip Conveying & Process Vacuum
Resin & Plastic	Processing & Conveying
Soil Remediation	Vacuum Extraction & Sparging
Vacuum Excavation	Potholing & Slurry Recovery
Wastewater	Aeration & Backwashing

The above table illustrates industries which depend upon the Sutorbilt® Legend® to deliver clean, oil-free air to a wide range of global applications.

## Legendary Design Features

**1** High-strength impeller case is heavily ribbed and machined from a single piece of cast iron and features oversized dowel pins for precise mounting and alignment of head plates.

*These features result in reduced noise and more stable, vibration-free operation.*

**2** Head plates, machined from cast iron, are ground on the interior surface to precise operating tolerances. Bearing fits are machined into head plates to assure exact bearing positioning.

*This ensures accurate, fixed-dimension clearances through all blower operating conditions and temperature ranges.*

**3** Impellers are machined from cast iron to an exact profile and are permanently fastened to steel shafts. They are dynamically balanced for smooth operation in any assembled position.

*This provides extra strength and rigidity to handle continuous maximum loads without fatigue or deflection.*

2MP LHC

3MP RHC

4LVP BHC

5MP RHC

**4** Anti-friction bearings are used exclusively. Smaller models are fitted with single-row ball bearings and cylindrical roller bearings; large models have double-row ball bearings and spherical roller bearings.

*Optimum bearing selection provides longer blower life and added overhung shaft load capacity.*

**5** Timing gears, precision machined from alloy steel forgings, are permanently pinned to the shafts.

*This assures non-slip timing even under the most strenuous loading conditions.*

**6** High temperature Viton® oil seals.

*These maximize the seal life in continuous, severe-duty applications to provide leak-free operation.*

**7** Flex-Mount™ design is adaptable to either vertical or horizontal installation.

*The feet are precisely machined and match the footprints of many competitive units.*

**8** Timing gears and gear end bearings are splash lubricated utilizing an abundant oil reservoir. A graphite gasketed, oil-tight housing encloses the timing gears. Drive end bearings are grease lubricated through fittings. Lip-type seals prevent oil and grease from entering the impeller chamber.

*Superior gear and bearing lubrication is assured at all operating conditions with minimal maintenance.*

**9** High strength steel drive shaft is extended for V-belt drive or direct connection.

*This feature provides greater blower durability and installation flexibility.*

## Available with Mechanical Gas Seals

The Legend design accommodates mechanical gas seals for critical gas applications with proven results based on a large installed base.

*This field proven seal design allows trouble-free operation in critical gas applications.*

# The Sutorbilt Legend Design

## INTAKE

A constant volume of air or gas is drawn into the cylinder by the action of the turning impellers.

## DISCHARGE

A constant volume of air or gas is forced out through the discharge port.

## TRANSFER

A constant volume of trapped air or gas is transferred around the cylinder to the discharge port.

## The Sutorbilt PD Cycle

- Two figure-eight impellers turn in opposite directions within a machined housing
- Transferring a constant volume of air or gas from inlet to discharge with every rotation of the blower drive shaft
- No lubrication within the cylinder is required
- Rotating components are held in close tolerance do not contact each other
- Impeller positioning is maintained by precision timing gears affixed to each impeller shaft
- Gear and bearing lubrication occurs externally to the cylinder assuring clean, oil-free gas delivery under all operating conditions

## Flex-Mount™ Design Provides Maximum Installation Versatility

- Flex-Mount™ design allows the Legend application flexibility
- Creating interchangeability on existing and new applications
- Compatible as replacements for most competitive installations

## State-of-the-Art Quality

Gardner Denver's Sutorbilt Legend blowers and vacuum pumps are engineered and manufactured under strict ISO 9001:2000 quality standards in our 330,000 square foot state-of-the-art facility in Sedalia, MO (photo below)

- Gardner Denver makes it a priority to invest in highly skilled people who take pride in producing quality products
- Our Flexible Machining System (FMS) assures consistent production of the highest quality Legend components
- Attention to detail is found throughout the manufacturing process such as utilizing advanced coordinate measuring equipment (photo A)
- Legend components are subjected to quality inspections before assembly
- Prior to shipment, every Legend is tested against rigid standards using our computer automated testing stations (photo B)

S=Threaded connections standard NPT. F=flange connections. Inlet and outlet connections are the same type and size. Dimensions are in inches. Weights are in pounds and include shipping cartons or pallets.
