

# Construction Details CXV Models

## 1 Heavy-Duty Construction

- G-235 (Z700 metric) hot-dip galvanized steel panels

## 2 BALTIDRIVE® Power Train

- Premium quality, solid-backed, multi-groove belt
- Corrosion resistant cast aluminum sheaves
- Heavy-duty bearings (280,000 hour average life)
- Cooling tower duty fan motor
- 5-year motor and drive warranty

## 3 Low HP Axial Fan(s)

- Quiet operation
- Corrosion resistant

## 4 Water Distribution System

- Visible and accessible during operation
- Overlapping spray patterns ensure proper water coverage
- Large orifice, 360° non-clog nozzles

## 5 Coil Section (Not Shown)

- Continuous serpentine, steel tubing
- Hot-dip galvanized after fabrication (HDGAF)
- Pneumatically tested at 375 psig
- Sloped tubes for free drainage of fluid
- ASME B31.5 compliant
- Orders shipping into Canada are supplied with a CRN

## 6 BACross® Fill with Integral Drift Eliminators (Not Shown)

- Polyvinyl chloride (PVC)
- Impervious to rot, decay and biological attack
- Flame spread rating of 5 per ASTM E84-77a

## 7 FRP Air Inlet Louvers

- Corrosion resistant
- UV resistant finish
- Maintenance free

## 8 Cold Water Basin

- Sloped cold water basin for easy cleaning
- Suction strainer with anti-vortex hood accessible from louver face
- Adjustable water make-up assembly accessible from louver face
- Integral internal walkway

## 9 Recirculating Spray Water Pump

- Close coupled, bronze fitted centrifugal pump
- Totally enclosed fan cooled (TEFC) motor
- Bleed line with metering valve installed from pump discharge to overflow

## 10 Hinged Access Doors

- Inward swinging door on each end wall

# Models CXV-196 to 481

**Do not use for construction.** Refer to factory certified dimensions. This handbook includes data current at the time of publication, which should be reconfirmed at the time of purchase. Up-to-date engineering data, free product selection software and more can be found at [www.BaltimoreAircoil.com](http://www.BaltimoreAircoil.com).

#### Notes:

- Model number denotes nominal ammonia capacity in evaporator tons at a 96.3°F condensing temperature, a 20°F suction temperature, and a 78°F wet-bulb temperature.
- R-22 tons are at a 105°F condensing temperature, a 40°F suction temperature, and a 78°F wet-bulb temperature.
- Operating weight is for the unit with the water level in the cold water basin at the overflow.
- For R-22 and R-134a, the coil connection quantity will double (except for the CXV-64 thru -153).
- The R-22 operating charge is 1.93 times the ammonia charge; R-134a is 1.98 times.
- Inlet and outlet connections are beveled for welding.
- Standard make-up, drain and overflow connections are MPT.

CXV-305	13,970	21,160	9810	4"	51 3/4"

NOTES:

1. ALL DIMENSIONS ARE IN FEET AND INCHES. WEIGHTS ARE IN POUNDS.
2. DIMENSIONS SHOWING LOCATION OF COIL CONNECTIONS ARE APPROXIMATE AND SHOULD NOT BE USED FOR PREFABRICATION OF CONNECTING PIPING.
3. COIL CONNECTIONS ARE IPS BEVELLED FOR WELDING.
4. CONNECTIONS 3" & SMALLER ARE MPT.
5. THE AREA ABOVE THE DISCHARGE OF THE FAN MUST BE UNOBSTRUCTED.
6. FOR WEIGHT LOADING AND SUPPORT REQUIREMENTS REFER TO THE SUGGESTED STEEL SUPPORT DRAWING.
