Page	320.1
Issue	F

### FEATURES

<ol> <li>Pressure</li></ol>	250 PSI (17 BAR) for 100 SSU (21 cSt) and above
Range	③ 100 PSI (7 BAR) for less than 100 SSU (21 cSt)
<ol> <li>Temperature Range</li> </ol>	-60°F. to +350°F. (-51°C. to +177°C.)
Viscosity	28 SSU to 7,500 SSU
Range	(1.0 cP to 1,650 cSt)

#### RELIEF VALVE "C", "F" and "FH" SIZES (Standard Equipment)

Permits by-passing of liquid from discharge back to suction side of pump. Prevents building up excessive pressure in discharge line. If reversing pump at any time, valve parts must be inserted in opposite port. Pumps with relief valve built with right hand suction as standard. Left hand special.

#### MECHANICAL SEAL "C", "F" and "FH" SIZES

All models in the above range can be furnished with mechanical seal as well as conventional packing. The seal is a rotary type packaged unit that is simple and self-adjusting.

### ② GPM ½ - 1½ - 3 (m³/hr .1 - .3 - .7) (Nominal Rating)

The 56M and 456M units are motor mounted and answer the need for more compact, lighter weight equipment. They use the Series 56 and 456 hub type pumps with valves in casings and are mounted to NEMA "C" flange motors. Units are available with  $\frac{1}{4}$ ,  $\frac{1}{3}$ ,  $\frac{1}{2}$  or  $\frac{3}{4}$  HP, 1 ph, 1200 RPM or 1800 RPM, special shaft, open or explosion proof motors. All sizes use the mounting flange bracket with pump connected to motor through coupling. Pump can be turned in bracket to any position desired. Mechanical seal equipped Series 456 pump models are available with Underwriters label for handling fuel oil. Model numbers for these pumps must be designated by a suffix -X. "UL" listed models must be equipped with integral relief valve.

Dimensions for Unmounted Pumps and "M" Drive Units —See Page 320.5.

Performance Data for Unmounted Pumps and "M" Drive Units—See Pages 320.9 thru 320.14.

 See following pages or consult factory for specific recommendations on individual models or sizes.

② Nominal capacities based on handling thin liquids.

③ 150 PSI (7 BAR) handling fuel oil less than 100 SSU (21 cSt).

Metric conversions are based on US measurements and rounded to the nearest whole number.

① Buna N elastomer used in mechanical seal of 456 Series pumps.

② Valve integral with pump casing. Right hand suction standard.

③ Mechanical Seal Pumps not recommended on applications with viscosities above 15,000 SSU (3,300 cSt).

M  $\overset{4}{1}$  HP smallest readily available motor; see performance curves for actual horsepower.

Metric conversions are based on US measurements and rounded to the nearest whole number.

 $\textcircled{\sc 50}$  PSI maximum for bronze fitted pumps.

⑥ 100 PSI maximum for bronze fitted pumps.

⑦ With extra clearance, pumps can be used to 500 PSI (34 BAR) on intermittent duty.

③ Temperatures to 350° F. can be handled with special construction.

Includes ½ HP, 1 PH. open motor.

0 Mechanical seal seat has bronze bushing.

### FEATURES

SERIES 75 and 475 Lip and Mechanical Seal Unmounted Pumps "G" and "GG" sizes

Pressure	50 PSI (3 BAR) (SERIES 75)
Range	100 PSI (7 BAR) (SERIES 475)
① Temperature Range	-20°F. to +350°F. (-29°C. to +177°C.)
① Viscosity Range	28 SSU to 2500 SSU (1.0 cP to 550 cSt)

#### VIKING CLOSE-COUPLED PUMP FEATURES SAVES SPACE

Over-all space (length, height and width) is cut to a minimum with Viking's close-coupled pumps. Complete unmounted pump in all five sizes, 5 to 30 GPM, requires only approximately 5" of space.

#### NO DRIVE EQUIPMENT NEEDED

No couplings, bases, gears or outboard bearings. Standard motor shafts are keyed directly to the Viking rotor pump gear eliminating all extra drive equipment. Simple and compact.

### ② GPM 5 - 7- 10 - 13 - 15 - 20 - 30 (m³/hr 1 - 1.5 - 2 - 3 - 3.5 - 4.5 - 7) (Nominal Rating)

For compactness, less weight and simplicity of mounting, Viking's line of close-coupled pumps are ideal for direct connecting to other pieces of equipment.

The positive, smooth delivery, of these pumps makes them preferred for many types of applications including filtering, circulating, transferring, lubricating or booster service.

The five sizes of Viking close-coupled pumps from 5 to 30 GPM are available in this unmounted type ready to connect on other equipment with standard NEMA "C" flange mounting.

All pumps are available with rotor bore to fit the shaft of a standard motor or other piece of equipment. Bores are furnished in  $\frac{5}{8}$ " and  $\frac{7}{8}$ ".

By using a full length key between drive shaft and rotor bore, rigid and positive alignment of pump and drive shaft is assured.

All five pumps operating at 1800 RPM and pumping liquids up to 750 SSU deliver 7, 10, 15, 20 and 30 GPM.

③ See following pages or consult factory for specific recommendations on individual models or sizes.

 $\ensuremath{\textcircled{}}$  Nominal capacities based on handling thin liquids.

Metric conversions are based on US measurements and rounded to the nearest whole number.

## MOUNTED AND UNMOUNTED PUMPS

This advanced design of Viking's line of close-coupled pumps is unique in its field for it permits use of STAND-ARD, unmodified NEMA "C" flange ball bearing motors in 1800 and 1200 RPM speeds, 56C, 143TC and 145TC frame sizes.

It is extremely close-coupled, reducing needed space, cutting overall weight, eliminating bases, couplings, outboard bearings or any drive equipment and at the same time saves cost of these many items.

These Viking "gear-within-a-gear", self-priming, positive displacement pumps are ideal for filtering, circulating, transferring, lubricating or booster service.

All five sizes are equipped with opposite ports. Only two casing sizes are used for all five pumps. The two smaller pumps use one casing and the three larger pumps use the other.

All five pumps are built to accept a compact, integral relief valve mounted on top of casing to maintain extreme compactness.

All pumps are available with either mechanical seal suitable for 100 PSI pressure or a lip seal suitable for 50 PSI. No modification of parts are needed to convert from one seal to the other.

Dimensions for Unmounted Pumps and "M" Drive Units —See Page 320.6.

Performance Data for Unmounted Pumps and "M" Drive Units—See Pages 320.15 thru 320.19.

### DIMENSIONS

These dimensions are average and not for construction purposes. Certified prints on request.

For specifications, see pages 320.1 and 320.2.

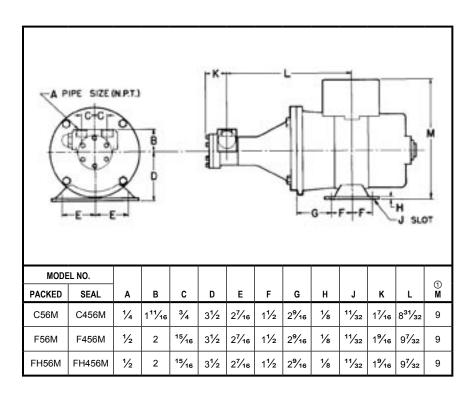

## DIMENSIONS – 56 AND 456 SERIES UNMOUNTED PUMPS

NOTE: Shafts as shown on these pumps will NOT work on "M" drive units shown below. "G" dimension of 3%" is required.

For specifications, see pages 320.1 and 320.2

DIMENSIONS – 56 AND 456 SERIES ("M" DRIVE)

① This dimension approximate. Depends on motor manufacturer, size and type of enclosure.

NOTE: Pump may be turned in bracket to any position desired.

Overall dimension of pump and motor will vary depending on motor frame, type of enclosure and manufacturer.
