Introducing Our Complete Selection of Equipment for the Cleaning and Rinsing of Bottles and Containers.

Orbit Bottle Rinser

With 5 models to choose from, the ORBIT can handle your cleaning needs. Air cleaning, liquid rinsing, steam rinsing or gas flushing is performed through a direct tube, injected inside each container or vial. Multiple revolutions and a duplex rotor have been designed for your complex cleaning requirements and vial washing capabilities.

HS-600 Gripper

High speed cleaning/rinsing demands stable container handling. The HS-600 is designed to handle containers at speeds up to 700 cpm. Built-in infeed and discharge conveyors along with soft rubber belting, achieves positive container handling through the HS-600. No change parts, motorized push-button changeover and a low profile make the HS-600 the ideal high speed cleaner/rinser on the market today.

Exterior Single Pass Vial Washer/Dryer

The Model #40 is designed to provide the most advanced outside vial cleaning, rinsing and drying possible. Features no cap wetting, no change parts, tool-less changeover, simple design, high vial visibility, 500 vpm. Different models to choose from with multiple pass design of 1, 2, 4, 6 & 8 passes with choice of rinse sequence.

Bottle Duster

Complete selection of McBrady Dusters (4 models) to clean the tops, bottoms, sides and rims of bottles, cans and containers. Every Duster model cleans and dusts utilizing ionized compressed air, brushing, spinning and vacuuming to quickly remove dust and powder. Tool-less changeover, speeds to 400 cpm.
