

4-Piston MRM Elgin Filler S/N 84-10845, 4 in. center-to-center, 15 in. maximum head movement, 1 in. nozzles, non-stop conveyor, 8 in. Wide SS belt, hopper 30 x 20 in. top 14 x 6 in. base 28 in. deep, 88 in. H x 69 in. L x 110 in. W. The hopper has 4 rectangles 2 in. wide, 1-1/2 in. long each

Elgin Piston Filler It is in first class operating condition. The pertinent information is as follows:

- (4) Head Walking Beam (non-stop filling) Piston Filler
- 32 oz Cylinders
- approximately 60-120 bottles per minute (15-30 cycles per minute) less on the gallon bottles
- Heated 40 Gallon Hopper
- No Bottle / No Fill Sensor
- 8 FT Stainless Steel Conveyor with Drive
- 2 index screws (one for round gallons, one for quart boston rounds or mayo jars) - (2) sets of nozzles (5/8" and 3/4")
- Maintenance and Operations Manual
- Positive cut off for no drip filling
- Refurbishment Includes: -resurfaced all four cylinder faces -resurfaced walking filler head including positive cutoff slide -new rods for walking filler head (promotes smooth travel of fill head) -new piston cups and seals -new "O" rings throughout -new Thompson bearings in walking fill head

This filler will fill thick products including more viscous, cohesive products with great speed and accuracy. The containers never stop as they are indexed by the screw and filled with the walking fill head. This allows for much faster filling speeds than your normal 4 head piston filler with a stop and go indexing system. This machine was running great when it was taken off the line. It has been stored in a warehouse for about 6 months now. It was originally built to run 1000 Island salad dressing, Onion relish, and Barbeque Sauces into quart and gallon containers. It has special features for filling the gallon jars according to Elgin. Serial number is 84-10845.
